IOT SECURITY ASSESSMENT

IOT OFFERS MANY BENEFITS AS WE MOVE INTO A SMARTER MORE CONNECTED WORLD, BUT AS WITH ALL EMERGING TECHNOLOGY IT IS IMPORTANT TO UNDERSTAND THE RISKS AS WELL AS THE BENEFITS IN ORDER TO CREATE LONG TERM, SUSTAINABLE, RESILIENT IOT SERVICES.

As the IoT matures and scales to help address some of the key challenges of our time, it is important that the technology is appropriately protected in order to deliver the desired outcomes and provide a return on investment. Business' developing or employing IoT solutions should be aware of the risks and adopt organisational and technical measures to mitigate them.

Gemserv's IoT device security assessment has been developed by our team of experienced technical consultants with an in-depth understanding of IoT technologies, protocols and architecture.

Based on emerging IoT security specifications and best practices, the assessment provides both OEMs and service providers with the information required to identify gaps, analyse risks and plan appropriate mitigations for any IoT device or service.

KEY BENEFITS

- Independent confidential security assessment
- Identify security risks
- Plan and prioritise security mitigations
- Build trust and differentiate from competitors
- Protect consumers and comply with emerging regulations

DELIVERABLES

- A confidential report of compliance against the assessment framework
- Identification of potential gaps and non-compliances
- Identification of risks, and recommended mitigations
- Prioritisation of risks and mitigations
